Course Description
The lectures will closely follow the textbook, and many of the assignments will be drawn from the textbook. Therefore, it is a good idea to have access to the textbook starting from the first day of class. There may also be assignments, covering the relevant materials, from outside the textbook. This semester we will aim to cover Chapters 9–14 of Townsend’s book. If there is time, we will also cover Chapter 8.

Prerequisites
Understanding of the materials covered by the following courses will be assumed:
PHYS 0477 or 0479: Principles of modern physics
MATH 0280 or 1180 or 1185: Linear algebra
PHYS 1331: Mechanics
PHYS 1351: Electricity and Magnetism
PHYS 1370: QM I

Homework
Solving the homework problems is an integral part of learning quantum mechanics. Homework problems will be assigned on Friday of each week and will be due the following Friday. Students are strongly encouraged to discuss homework problems with each other (copying solutions is, of course, prohibited). The solutions will be handed out in class on the day that they are due, and hence late homework will not be accepted. We will aim to return your graded homework within a week of its due date. If you have a question as to how your homework was graded, please contact the grader within a week of when your homework was returned.

Office hours
The best time to find me is immediately following the lecture. If you need to talk to me at some other time, please schedule an appointment by email.
Grading scheme and other details (preliminary)
The grade for the class will consists of four components

(1) **Homework** — 25%

(2) **Midterm exam** — 25%
   The midterm exam will be held in class on Wednesday, 2nd of March.

(3) **Final exam** — 40%
   The final exam is scheduled by the registrar for 8-9:50 pm on Friday, April 29th.

(4) **Clicker questions** — 10%
   The clicker questions will be awarded 1 point for correct answers and 0.8 points for incorrect
   answers. The goal of the clicker questions is to encourage class participation and provide
   me with feedback on your understanding of the concepts covered in class.

Special accommodations for disability
If you have a disability that requires special testing or other accommodations, you should notify
both the instructor and the Office of Disability Resources and Services (DRS) as early as
possible in the term. You may be asked to provide documentation of your disability to determine
the appropriateness of accommodations. The Office of Disability Resources and Services is
located in the William Pitt Union, Room 216. If needed, please call (412) 648-7890 (voice) or
(412) 383-7355 (TTY) to schedule an appointment with them. A comprehensive description of
the services provided by DRS office can be obtained at their web site (http://
www.studentaffairs.pitt.edu/drswelcome).
