

## Phys 2565: Non-Relativistic Quantum Mechanics I Fall 2021

### Course Information:

Location 106 Allen Hall  
Lecture Monday, Wednesday, Friday 11:00 – 11:50  
Text *Principles of Quantum Mechanics, 2<sup>nd</sup> Edition*, Shankar  
Professor Adam Leibovich  
Contact info email [akl2@pitt.edu](mailto:akl2@pitt.edu) (please put Physics 2565 in the subject line)  
Office 414 Allen Hall  
Office hours Wednesday 4:00-5:00, 414 Allen Hall  
Thursday 3:00-4:00, <https://pitt.zoom.us/j/98205766337>  
or by appointment

These are obviously unusual times. We do not know how the semester will play out. We will all need to remain as flexible and adaptive as possible. I am expecting that most of the class, if not all, will be taught in person, but we may have to move to on-line instruction if the situation warrants.

**Course Description and Objectives:** This course is the first of a two-term introductory sequence on non-relativistic quantum mechanics. For some of you, much of this course may be a review, but it is important to have a deep understanding of the principles of quantum mechanics in order to understand advanced topics. Topics to be covered in the first term include: review of mathematical concepts, the postulates of quantum mechanics, one-dimensional problems, the harmonic oscillator, the path integral approach to quantum mechanics, symmetries and angular momentum, and the Hydrogen atom.

**Class Participation:** I encourage you to participate fully in class discussions. I strongly encourage you to ask questions to clarify any doubts. There is no such thing as a dumb question. Chances are, if you are confused, someone else in the class is also confused, which means that I did not do a good enough job explaining something. Please stop me when this happens, so I can try again.

**Textbook:** *Principles of Quantum Mechanics 2<sup>nd</sup> Ed*, by R. Shankar is the required book for this course. Many of the homework problems will be taken from this textbook.

**Homework:** Problem-solving skills are important to learning and understanding physics and so homework is an important part of the course. Homework will usually be due Friday by the start of class. The next problem set will be posted at least one week in advance. There will be approximately 12 homework sets during the semester. Working through homework assignments and other practice problems is the single best way to learn the material. As a practical matter, it will be important to practice the material in order to perform well on the exams. You may work on the homework together (in fact, that is encouraged), but everyone must turn in an independently prepared problem set.

**Exams:** There will be one mid-term exam and a final examination. The exams are

expected to fall on (may change if the needed):

- Exam 1: Wednesday, October 13
- Final: Week of December 13

**Course Grades:** Your grade in the course will be based on homework and exams. The grades will be weighted according to the table below:

Homework	20%
Midterm Exam	40%
Final Exam	40%

**Rough timeline:**

Given the extraordinary circumstances that we find ourselves in, this timeline will almost definitely change. However, to give a sense of how I expect the class to flow, here is the very rough timeline.

Mathematical Introduction	8 lectures
Postulates of Quantum Mechanics	4 lectures
One-dimensional Problems	4 lectures
The Classical Limit	1 lecture
The Harmonic Oscillator	3 lectures
Path Integral	1 lecture
Heisenberg Uncertainty Relations	2 lectures
Systems with $N$ Degrees of Freedom	4 lectures
Symmetries	4 lectures
Angular Momentum	5 lectures
The Hydrogen Atom	3 lectures

## **Course policies:**

### **Late work and exam conflicts:**

Students may obtain an excused absence, and special arrangements may be made if a student is unable to participate in a course requirement (e.g., an exam) for good cause, such as illness or other serious circumstance beyond a student's control and preventing participation. In the occurrence of such good cause, the student must inform the instructor immediately.

In general, late homework submissions will not be accepted, without good cause.

Special or make-up examinations may be given in the case of an excused absence. A student's failure to take a scheduled examination without good cause and without proper notice will result in that student's receiving a 0% grade for that exam.

### **General Grading Guidelines:**

**No credit** will be given for correct answers that do not give proper justification.

**No credit** will be given for answers that do not have appropriate units (where applicable).

**Partial credit** will be given for incorrect answers if you acknowledge that your answer is incorrect, describe the manner in which you determined your answer to be incorrect, and speculate on the cause of the error.

**No credit** will be given for work that is illegible or so disorganized that it is difficult for the Instructor to follow. Your work must flow sequentially from left to right across the page and from top to bottom down the page. No credit will be given for work if the sequence of steps is difficult to determine. These rules will be enforced even if your final answer is correct. It is your responsibility, and your responsibility only, to present your work in a manner that is clear, well-organized, and legible.

**Academic Integrity:** Students in this course will be expected to comply with the [University of Pittsburgh's Policy on Academic Integrity](#). Any student suspected of violating this obligation for any reason during the semester will be required to participate in the procedural process, initiated at the instructor level, as outlined in the University Guidelines on Academic Integrity. This may include, but is not limited to, the confiscation of the examination of any individual suspected of violating University Policy. Furthermore, no student may bring any unauthorized materials to an exam, including dictionaries and programmable calculators.

To learn more about Academic Integrity, visit [Academic Integrity Guide](#) for an overview of the topic. For hands-on practice, complete the [Understanding and Avoiding Plagiarism tutorial](#).

**Disabilities Services:** If you have a disability for which you are or may be requesting an accommodation, you are encouraged to contact both your instructor and [Disability Resources and Services](#) (DRS), 140 William Pitt Union, (412) 648-7890, [drsrecep@pitt.edu](mailto:drsrecep@pitt.edu), (412) 228-5347 for P3 ASL users, as early as possible in the term. DRS will verify your disability and determine reasonable accommodations for this course.

**Health and Safety Statement:** In the midst of this pandemic, it is extremely important that you abide by public health regulations and the University of Pittsburgh health standards and guidelines. While in class, at a minimum this means that you must wear a face covering; other requirements may be added by the University during the semester. These rules have been developed to protect the health and safety of all community members. Failure to comply with these requirements will result in you not being permitted to attend class in person and could result in a Student Conduct violation. For the most up-to-date information and guidance, please visit [coronavirus.pitt.edu](https://coronavirus.pitt.edu) and check your Pitt email for updates before each class.

**Accessibility:** The Canvas LMS platform was built using the most modern HTML and CSS technologies, and is committed to W3C's Web Accessibility Initiative and [Section 508](#) guidelines. Specific details regarding individual [feature compliance](#) are documented and updated regularly.

**Diversity and Inclusion:** The University of Pittsburgh does not tolerate any form of discrimination, harassment, or retaliation based on disability, race, color, religion, national origin, ancestry, genetic information, marital status, familial status, sex, age, sexual orientation, veteran status or gender identity or other factors as stated in the University's Title IX policy. The University is committed to taking prompt action to end a hostile environment that interferes with the University's mission. For more information about policies, procedures, and practices, see: <https://www.diversity.pitt.edu/civil-rights-title-ix-compliance/policies-procedures-and-practices>.

I ask that everyone in the class strive to help ensure that other members of this class can learn in a supportive and respectful environment. If there are instances of the aforementioned issues, please contact the Title IX Coordinator, by calling 412-648-7860, or e-mailing [titleixcoordinator@pitt.edu](mailto:titleixcoordinator@pitt.edu). Reports can also be filed online: <https://www.diversity.pitt.edu/civil-rights-title-ix-compliance/make-report/report-form>. You may also choose to report this to a faculty/staff member; they are required to communicate this to the University's Office of Diversity and Inclusion. If you wish to maintain complete confidentiality, you may also contact the University Counseling Center (412-648-7930).

**Gender Inclusive Language Statement:** Language is gender-inclusive and non-sexist when we use words that affirm and respect how people describe, express, and experience their gender. Just as sexist language excludes women's experiences, non-gender-inclusive language excludes the experiences of individuals whose identities may not fit the gender binary, and/or who may not identify with the sex they were assigned at birth. Identities including trans, intersex, and genderqueer reflect personal descriptions, expressions, and experiences. Gender-inclusive/non-sexist language acknowledges people of any gender (for example, first year student versus freshman, chair versus chairman, humankind versus mankind, etc.). It also affirms non-binary gender identifications, and recognizes the difference between biological sex and gender expression. Students, faculty, and staff may share their preferred pronouns and names, and these gender identities and gender expressions should be honored.

**Take Care of Yourself:** Do your best to maintain a healthy lifestyle this semester by eating well, exercising, avoiding drugs and alcohol, getting enough sleep, and taking time to relax. Despite what you might hear, using your time to take care of yourself will actually help you achieve your academic goals more than spending too much time studying. All of us benefit from support and guidance during times of struggle. There are many helpful resources available at Pitt. An important part of the college experience is learning how to ask for help. Take the time to learn about all that's available and take advantage of it. Ask for support sooner rather than later – this always helps. If you or anyone you know experiences any academic stress, difficult life events, or difficult feelings like anxiety or depression, we strongly encourage you to seek support. Consider reaching out to a friend, faculty or family member you trust for assistance connecting to the support that can help.

The University Counseling Center is here for you: call 412-648-7930 and visit their website.

If you or someone you know is feeling suicidal, call someone immediately, day or night:  
University Counseling Center (UCC): 412 648-7930  
University Counseling Center Mental Health Crisis Response: 412-648-7930 x1 Resolve  
Crisis Network: 888-796-8226 (888-7-YOU-CAN)

If the situation is life threatening, call the Police: On-campus: Pitt Police: 412-268-2121  
Off-campus: 911
